

Assignment -4

Docker and Kubernetes

Assignment Date	12 November 2022
Student Name	MAHALAKSHMI
Student Roll Number	210819104056
Maximum Marks	2 Marks

1. Pull an image from docker hub and run it in docker Playground

The screenshot shows a web browser with two tabs: Docker Hub and Docker Playground. The Docker Hub tab displays the repository page for `uifd/ui-for-docker`, which is marked as deprecated. It provides a Docker pull command: `docker pull uifd/ui-for-docker`. The Docker Playground tab shows a virtual machine instance named `cd9an2u3_cd9av060qau0008hbjs0` with IP `192.168.0.13`. The terminal window in the playground shows the execution of the `docker pull` command, which successfully pulls the latest image from Docker Hub. The terminal output includes the image ID, digest, and status. The user then runs `docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker` to start the container.

Docker Hub Repository: uifd/ui-for-docker

By `uifd` • Updated 6 years ago

A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features.

Overview Tags

UI For Docker

This repo is deprecated. Development continues at: [portainer/portainer](#)

chat on [gitter](#)

UI For Docker is a web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker.

Goals

Docker Pull Command

```
docker pull uifd/ui-for-docker
```

Docker Playground Instance: cd9an2u3_cd9av060qau0008hbjs0

IP: 192.168.0.13

Memory: CPU

SSH: `ssh ip172-18-0-4-cd9an2u3tccg00fg6k0@direct.labs.play-with-docker.com`

DELETE EDITOR

```
# This is a sandbox environment. Using personal credentials
# is HIGHLY discouraged. Any consequences of doing so are
# completely the user's responsibilities.
#
# The PWD team.
#####
[node1] (local) root@192.168.0.13 ~
$ docker pull uifd/ui-for-docker
